

PERSONAL LEARNING PROJECT

Using Power BI

CREATED BY KARTIKA DEVI | 2026

PROJECT OVERVIEW

E-Commerce Dashboard

This dashboard was created as a personal learning project **to develop skills in data processing, analysis, and visualization** using Power BI. presents an analysis of E-Commerce Data over a two-year period, including Total Revenue, Profit Margin, Unique Customer, AVG Order Value, TOP Product, and Trends by Month. The analysis was performed using DAX (Data Analysis Expressions) for KPI calculations and interactive visualizations equipped with slicers, making it easier for users to explore the data and support business decision-making.

Dataset from Kaggle.
